DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Claim 21 is objected to because of the following informalities: the current language of "forming a solution or suspension of a liquid and a printing material; applying a layer of the solution or suspension to said substrate...with the relief patterns in contact with the layer of the solution or suspension, evaporation the liquid from said solution or suspension...and deposit the material" does not clearly describe the process. As recited, there is a solution or suspension of liquid and printing material. However, in line 6 of claim 21, only the solution or suspension of liquid is applied to the substrate, which leaves the printing material completely off the substrate. Therefore, when the solution or suspension of liquid is evaporated, there is nothing left on the substrate. The phrase "the material" seen in line 15 of claim 21 lacks antecedent basis, not clearly defining it or what it's in reference to. Once the evaporation step takes place, there is nothing left on the substrate to print upon.

A possible suggestion:

A printing process for obtaining patterns of nanometer and micrometer dimensions on a substrate, comprising the steps of; forming a solution of liquid and printing material, applying a layer of the solution to said substrate, positioning, without applying pressure, of a stamp provided with relief patterns at a distance of 0nm to 500um from the substrate with the relief patterns in contact with the layer of the solution, evaporating the liquid from the said solution from between the substrate and the stamp

Art Unit: 2854

so as to draw the printing material by capillarity to the relief patterns and deposit the printing material on the substrate in accordance with the relief patterns of the stamp, and thereafter separating the stamp from the substrate.

Therefore, claims 21-37 are objected to for the reason statement above, however claims 21-37 would be allowed if the above objection was overcome in applicant's next response to this Office Action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
